NEW DELHI 3 (INDIA);

The 7th August, 1950.

S. P. JAIN,

for Registrar General, India.

# NATIONAL SAVINGS ERTIFICATES

Are now available in three different series, maturing after 5. 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. \$25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers or the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simia.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 15th July, 1950

<sup>•</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

<sup>+</sup> Figures not available.

Explanation of symbols used:—B. = Births; B.R. = Birth rate; C. = Cholera; S. = Smallpox; P. = Plague; F. = Fevers; D.D. = Dysentery and Distribus; R.D. = Respiratory diseases; M.D. = Maternal Deaths; D.R. = Death rate; I.D. = Infantile Deaths (included in total deaths)

#### REMARKS

The figures of births and deaths shown in this statement for the week ending the 15th July, 1950 relate to 153 towns with an estimated population of 17,919 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 66% of the total number of towns representing 63% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 11,045 and 5,990 representing birth and death rates of 32·1 and 17·1 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 133 towns with an estimated population of 15,309 thousands. Information about Assam, Bhopal, Bihar, West Bengal and Madhya Pradesh could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 66% of the total number of towns representing 62% of the total population is covered.

The numbers of births and deaths recorded in these towns were 94,68 and 5,190 representing birth and death rates of  $32 \cdot 2$  and  $17 \cdot 6$  per thousand of population respectively. The table at the end gives the position by States.

The town of Chittoor in Madras State recorded the high death rate of 58:3 per thousand of population. This was not due to any of the specified causes.

(B) States (Part B).—The data here relate to 20 towns with an estimated population of 2,610 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 63% of the total number of towns representing 80% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,577 and 800 representing birth and death rates of 31.4 and 15.9 per thousand of population respectively.
